EDUCATION

York University

Bachelor of Engineering in Software Engineering; GPA: 3.5/4.0

Toronto, ON

Sept. 2016 – Apr. 2021

EXPERIENCE

Software Developer

May 2022 – Present

Edge Analytics

Toronto, ON

- Founded and developed Edge Analytics, a data-driven sports analytics company, creating machine learning and statistical models in **TensorFlow** to identify and capitalize on high-value opportunities
- Developed tools using **Python** and **Selenium** to process and analyze **2,000+ daily opportunities**

Software Developer

Sept. 2020 – Apr. 2021

YuRide

Toronto, ON

- Spearheaded the development of a reward and loyalty system for the YuRide ridesharing application using **Spring Boot** and **MySQL**, boosting user engagement by 60%
- Consulted with 10+ key stakeholders and 20+ students to identify feasible incentives
- Integrated 50+ API endpoints and 15+ incentives currently supported by the ridesharing application

Automation Developer

June 2017 – Aug. 2020

Autovate

Toronto, ON

- Devised and implemented 300+ **Java**, **Python** and **Selenium** programs to automate tasks for **100+ clients**
- Built strong client relationships by deeply understanding unique challenges and delivering personalized solutions, achieving a 95% retention rate and **repeat business from 80% of clients**

PROJECTS

VBot | Java, Java ASM, Amazon EC2, Google Compute Engine

Jan. 2022 – June 2022

- Developed an automation client in **Java** which built upon the RuneWild game client, providing an API and additional context to develop and execute automation scripts
- Reverse-engineered bytecode using Java ASM, analyzing patterns to identify and access more than **100 key variables** within the client code
- Deployed and scaled the automation client on **10+ virtual machines** using Amazon EC2 and Google Compute Engine, optimizing the environment for automation tasks

TalkBox | Java, JavaFX

Jan. 2019 – Apr. 2019

- Led a team of 3 in the development of the TalkBox application, using **JavaFX**, which enables speech-impaired individuals to communicate through personalized audio buttons
- Designed and implemented an innovative feature that dynamically generated images and audio files from keywords, enabling users to create custom buttons 10x faster
- **Awarded Best Project** among 16 teams for its intuitive simplicity, functionality, and interactive user experience

Tussle | Java, XoBot API

June 2018 – Sept. 2018

- Implemented a virtual robot in Java using the XoBot API to compete in a tournament on ikov.io, trained the robot by engaging in combat with 5,000+ real players
- Trained the virtual robot by optimizing its decision-making algorithms, achieving a 250% increase in decision-making speed and **securing second place in the tournament**, earning \$2,500 in prize money.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres, MySQL), JavaScript, HTML/CSS

Frameworks: TensorFlow, Spring Boot, Selenium, React, Flask, JUnit

Developer Tools: Git, Docker, Amazon AWS, Google Cloud Platform, VS Code, PyCharm, IntelliJ, Eclipse
